By using the strength of Old Mutual and the skill and knowledge that comes from over 165 years of experience, we have created a premium investment solution that's exceptionally cost-effective.

Through smart fund selection, negotiated fees and our knowledge of financial markets, XtraMAX generates one portion of the extra value which is added to your investment upfront. We are able to generate this extra value because you commit your money in particular investment funds with us for five years. The other portion of the extra value is recouped from you over the five years.
